- Which of the statements given above is/are correct?

[ANS] b

[SOL] Recently, the Union Finance Ministry told the Supreme Court (SC) that demonetisation in 2016 led to a **phenomenal growth in digital transactions, shrunk fake currency and saw more income tax payers.**

**Statement 1 is not correct:** Stagflation is an economic phenomenon marked by a combination of recession and high inflation with high unemployment. An economy is said to be in stagflation when the country's GDP (Gross Domestic Product) is growing at a slow rate, even as inflation is rising. Increased government spending is good for the economy, but it can lead to scarcity in some goods and inflation will follow.

**Statement 2 is correct:** If the central bank increases interest rates in a bid to tame inflation, then it could increase the cost of borrowings and reduce the aggregate demand, worsening the slowdown. On the other hand, if it cuts interest rates to induce growth, this could make inflation worse. Stagflation therefore calls for solutions beyond the conventional monetary or fiscal policy tools.
