[SOL] In Context: The La Nina is being blamed this year for worsening the longest spell of heat waves in north, west and Central India.
 Statement 1 is not correct: El-Nino: It leads to warming in surface temperature of the eastern Pacific Ocean region. This is associated with an increase in rainfall along the western coast of South America and a decrease in rainfall over the Indian subcontinent. It also leads to westerly winds, instead of the generally occurring easterly winds.
 Statement 2 is correct: La-Nina: It is the reverse phenomenon of El-Nino. The temperatures over the eastern Pacific Ocean increases, along with a decrease in rainfall. Also, the rainfall over the Indian subcontinent increases, along with augmentation of the strength of surface-level easterly winds.
 El-Nino causes higher temperatures and lesser rainfall over the Indian subcontinent, during the monsoon season. On the other hand, la-Nina increases the rainfall and decreases the temperature. Therefore, it is the La-Nina which is (ironically!) much warmly welcomed in the Indian subcontinent.
 While El-Nino leads to drought events in the subcontinent, La-Nina is primarily associated with flood events. These disasters affect the socio-economic status of the affected communities.

[SOL] Option d is correct: Article 324 of the Constitution provides that the power of superintendence, direction and control of elections to parliament, state legislatures, the office of president of India and the office of vice president of India shall be vested in the election commission. It also entails the provisions related to the chief election commissioner and other election commissioners.

- The Constitution has not specified the term of the members of the Election Commission.
- The chief election commissioner and the two other election commissioners have equal powers and receive equal salaries, allowances and other perquisites, which are similar to those of a judge of the Supreme Court.
- Chief Election Commissioner can be removed by the president on the basis of a resolution passed to that effect by both the Houses of Parliament with the special majority, either on the ground of proved misbehaviour or incapacity. Thus, he does not hold his office till the pleasure of the president, though he is appointed by him.

[SOL] Recently, Inflation faced by Indian consumers shot up to a nearly eight-year high of 7.8% from 6.95%.

How do we prevent inflation?

- Change the monetary policy: The primary strategy is to change the monetary policy by adjusting the interest rates. Higher interest rates decrease the demand in the economy. This results in lower economic growth and therefore, lowers inflation.
- Controlling the money supply can also help in preventing inflation.
- Higher Income Tax rate can reduce spending, and hence resulting in lesser demand and inflationary pressures.
- Introducing policies to increase the efficiency and competitiveness of the economy helps in reducing the long term costs.
- Invest in long-term investments: When it comes to long-term investments, spending money now for investments can allow you to benefit from inflation in the future.

[SOL] With prolonged heat waves, it becomes pertinent to learn about environmental philosophy that reinvent the relationship between nature and humans — shallow and deep ecologism. Statement 1 is not correct: Exponents of Shallow ecologism believe in continuing our present lifestyle, but with specific tweaks aimed at minimising the damage to the environment. Also known as weak ecologism, it may include the use of vehicles that cause less pollution or air conditioners that do not release chlorofluorocarbons (CFCs). This branch of ecologism primarily serves to maintain the lifestyle of those dwelling in developed countries. Statement 2 is correct: Deep ecologism believes that humans should radically change their relationship with nature. Its proponents reject shallow ecologism for prioritising humans above other forms of life, and subsequently preserving the environmentally destructive way of life in modern societies. Deep ecologism maintains that by sustaining this lifestyle, shallow ecologism further widens the inequalities between countries.

[SOL] Option c is correct: There are many reasons for the formation of monsoons in India.
• The presence of the high-pressure area, east of Madagascar, approximately at 20°S over the Indian Ocean. The intensity and position of this high-pressure area affects the Indian Monsoon.
• The Tibetan plateau gets intensely heated during summer, which results in strong vertical air currents and the formation of low pressure over the plateau at about 9 km above sea level. Hence, statement 1 is incorrect.
• The movement of the westerly jet stream to the north of the Himalayas and the presence of the tropical easterly jet stream over the Indian peninsula during summer. Hence, statements 2 and 3 are correct.
Following are a few more reasons for the formation of monsoons in the Indian Subcontinent:
1. The differential heating and cooling of land and water creates low pressure on the landmass of India while the seas around experience comparatively high pressure.

2. The shift of the position of the Inter-Tropical Convergence Zone (ITCZ) in summer, over the Ganga plain (this is the equatorial trough normally positioned about 5°N of the equator. It is also known as the monsoon trough during the monsoon season).

[SOL] Recently, The IMF lifted the yuan's weighting in the Special Drawing Rights currency basket.

The 'Global Financial Stability Report' is prepared by the International Monetary Fund (IMF). International Monetary Fund was established in 1944 in the aftermath of the Great Depression of the 1930s.

- IMF and the World Bank are also known as the Bretton Woods twins because both were agreed to be set up at a conference in Bretton Woods in the US.
- It is governed by and accountable to the 190 countries that make up its near-global membership.
 - India became a member in December 1945.
- Aim: To ensure the stability of the international monetary system (the system of exchange rates and international payments) which enables countries and their citizens) to transact with each other.
 - Its mandate was updated in 2012 to include all macroeconomic and financial sector issues

that bear on global stability.

- Financing: The IMF's resources mainly come from the money that countries pay as their capital subscription (quotas) when they become members.
 - Each member of the IMF is assigned a quota, based broadly on its relative position in the world economy.
 - Countries can then borrow from this pool when they fall into financial difficulty.

[SOL] Statement 1 is correct: Demonetisation is the act of stripping money of its legal tender status. A legal tender is a coin or note recognized by law as a means to settle a debt.

Statement 2 is not correct: An increase in the Cash Reserve ratio decreases the money multiplication in the market as the banks need to put more cash with them in reserve and the money moving into the market would be less naturally reducing its multiplication.

Cash Reserve Ratio: It is the percentage of money that banks need to have with them and not lend a loan so as to be ready for any unforeseen situations.

Statement 3 is not correct: A haircut is a difference between the loan amount and the actual value of the asset used as collateral. It reflects the lender's perception of the risk of a fall in the value of assets. In simple terms, taking a haircut means “agreeing to settle a deal for a loss” which means banks will settle for loss in a deal with the borrower when the borrower declares bankruptcy.

[SOL] Point 1 is correct: Rising import costs and a growing current account deficit have been key reasons for the weakening of the rupee. India's merchandise trade deficit widened to \$20.1 billion in April.

Point 2 is correct: Oil and other imported components will get costlier, which will further lead to even higher inflation. India imports nearly 80% of its fuel requirements.

Point 3 is not correct: The US Federal Reserve's decision to tighten the monetary policy and hike interest rates has led foreign portfolio investors (FPI) to pull out Rs 168,000 crore since January 2022.

Point 4 is not correct: A strong dollar is good for export-oriented companies, but bad for import-oriented industries like oil, gas and chemicals. It is also bad for companies which pay foreign companies royalties for franchises in India. Exporters may benefit as the depreciation in currency improves the competitiveness of Indian goods and services. However, since most of the competing currencies are also depreciating against the US dollar, the benefit could be limited.

Therefore, option (a) is the correct answer.

[SOL] Recently, the Supreme Court allowed local body elections in Madhya Pradesh with reservation for OBCs on the basis of a second report filed by the state backward classes commission.

Statement 1 is correct: In Indira Sawhney vs Union of India (1992), the Supreme Court had upheld the 50-percent ceiling on reservations, thereby limiting states' powers. The nine-judge Bench in the case also established factors such as caste, social status, and income to ascertain backwardness. The Bench also introduced the concept of the 'creamy layer' to exclude more wealthy individuals from seeking the benefit of reservations.

Statement 2 is correct: There is no reservation for OBCs in Lakshadweep, Tripura, Meghalaya, Mizoram and Arunachal Pradesh due to the absence of any citizens belonging to OBC communities.

Statement 3 is correct: For OBC communities, there are no separate political reservations in State legislatures or local bodies.

Recently, the Ministry of External Affairs (MEA) said that two bridges built by China in the Pangong area which have been under the illegal occupation of China since the 1960s.

Statement 1 is not correct: Pangong Tso is a long, narrow, brackish lake spanning the Indian/Chinese border, in a valley in the upper drainage basin of the Indus river, at the east end of the Karakoram Range.

Statement 2 is correct: Only the westernmost one-third of the lake lies in Indian territory. It is a chain of four interconnecting lakes, formed by natural damming of the valley. Five rivers fed by perennial springs and snowmelt flow into the Indian portion of the lake. The runoff from the west end of the lake flows northwest into the Shyok river, a tributary of the Indus.

Statement 3 is not correct: Due to its extreme salinity, Pangong Tso does not have any vegetation in the deeper parts, but at the margins and marshy areas, typical, steppe vegetation is seen. Sedges and grasses are found towards the northern and eastern sides. The surrounding plateau and hills support low thorn scrub and perennial herbs.
